

GENERAL CHARACTERISTICS

- Power supply** 100-240 V_{AC} 50 Hz
- Standard** EN 60598-1, EN 60598-2-1, EN 60598-2-22 (basic requirements), EN 62471 (Biological hazard free), EN61493
- Protection grade** IP66 with vent valve, IK09
- Working temp.** -20°C +40°C
- Mounting** light tower, wall mounting, pole mounting, floor mounting
- Body** Polyester powder-coated die-cast aluminium, black
- Lenses** clear PMMA
- Driver** ED electronic, dimmable 0-10V (Cos $\varphi \geq 0, \geq 0,95$)
- Surge protection** 10kV
- MTBF Control gear**** 100.000h
- Luminous flux maintenance*** >50.000h (L70B20)
- Colour deviation** 3 SDCM

* At the reference working temperature of 25°C

SPECIAL VERSIONS: COLOUR TEMPERATURE ON REQUEST (5000K), POWER (500-600-750-1000-1250W), CHROMATIC YIELD

Accessories

included

Order code	Description
-	GONIOMETRIC BRACKET
-	M20 CABLE GLAND WITH VENT VALVE

Power Light

Floodlight

The Power Light floodlight allows you to illuminate large areas such as road sections, sports fields, industrial areas or car parks. Die-cast aluminium body with dissipating fins. Each module is equipped with a box to accommodate the driver and dissipate the operating temperature as best as possible. The product is supplied with standard 120° optic made of PMMA; 10°, 30° and 60° optic are available for ordering to cover any design requirement. The angular position of each module can be adjusted using the side goniometric adjustment devices. A laser pointer is available for ordering to facilitate installation and optimise installation times.

Version 250 - 300W
